Usage

Start. Stop. Keep charging.

The **intAct Start-Stop-Power EFB** was specially developed for modern vehicles with a start-stop system and combines **performance, durability and reliability.** Thanks to **EFB technology (Enhanced Flooded Battery)**, it offers **higher cycle stability** and **better cold-start performance** than conventional lead batteries - ideal for vehicles with frequent start-stop processes.

Advantages at a glance:

- **Higher cycle stability** for longer service life
- **Reliable cold start**, even at low temperatures
- **Cost-effective** than an AGM start-stop battery. **Attention: AGM may only be replaced by AGM, not by EFB!**
- **Maintenance-free** - no topping up necessary
