Usage

Extremely vibration-resistant design

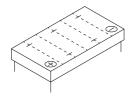

The durable energy bundle absorbs the strongest shocks from Harleys and other high-capacity bikes and also starts twowheelers with high electrical energy requirements (e.g. with ABS). Our recommendation for motorcycles that need a lot of starting power and of course with strong vibrations.

- » Perfect for Harleys and other bikes with high-capacity 2cylinder engines.
- » Highest cold cranking amper: For two-wheelers with high energy requirements, e.g. due to ABS safety technology.
- » Extremely vibration-resistant. Plate packs compressed and precisely fitted into the battery box.
- » Robust housing made of impact-resistant plastic. For heavy mechanical stress.
- » Leak-proof. Can be installed at an angle, as the electrolyte is absorbed in glass fibre mat.
- » Sealed maintenance-free.
