### Usage

## 30% extra starting power

More suitable for highly equipped vehicles with many electrical consumers and in intensive city traffic. With minimal self-discharge, particularly safe and temperature resistant. Our recommendation for vehicles with a lot of equipment, especially if short distances are driven frequently.

- » **30% more cranking power** than standard starter battery with the same case size.
- » **Fast charging. Up to 1.5 times shorter charging time** due to faster current consumption than standard starter batteries of the same box size.
- » **Double lid for increased leakage protection and vapour condensation** (gaseous electrolyte condenses in the labyrinth lid and remains in the circuit).
