

# intAct Flooded-Power - Marine & Leisure

Closed lead-acid battery with reinforced grid plates | filled and charged | low maintenance

Art.No.

## SP70GUG

Volt	12V
Capacity	50 Ah (c5), 62 Ah (c20), 70 Ah (c100)
CCR -18°C (EN)	-
Electrolyte	diluted sulphuric acid
Electrolyte density	1,28 +/- 0,01 Kg/l (25° C)
Size (LxWxH)	242 x 175 x 190 mm
Weight	15,3 kg
Pos. of Terminal	0
Terminal	1
Bodenleiste	B13

### Usage

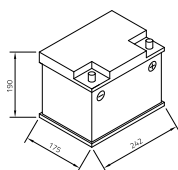

## intAct Flooded-Power - Marine & Leisure

Reliable wet-cell battery with good capacity absorption, high capacity reserves and proven technology - ideal for use in leisure, hobby and on the water.

- » Filled and charged. Ready for immediate use.
- » Light cyclical use. 300 cycles according to IEC 254-1.
- » Reinforced special-insulation grid plates with high mass utilisation for maximum capacity reserves.
- » Robust, technically uncomplicated, mature technology for applications with low, reliable power requirements.
- » Ideal for stand-by operation.
- » Excellent value for money. Durable, safe and reliable.
